## HAVE YOUR SAY ON THE FUTURE OF **TEXT AND DATA MINING!**

**FutureTDM** is a European Commission funded action to enable text and data mining (TDM) in Europe. We are holding several knowledge cafés across Europe over the coming months as an informal opportunity to gather feedback on text and data mining in the EU from researchers, developers, publishers, SMEs and any other stakeholder groups working in the field.

This information will feed into our reports and recommendations and be made available on the FutureTDM Online Information Hub, a web space developed for and by the TDM community to share expertise, build on best practice and collaborate.

Get involved now!  
Register for TDM KNOWLEDGE CAFÉS at
